Creating Communities of Innovation | QUALITIES OF INQUIRY-DRIVEN INNOVATION

Purposeful & Intentional

Addresses a specific need or interest; involves deliberate design choices throughout the process.

Attentive to Multiple Perspectives

Engages educators who offer a variety of perspectives (e.g. by role, professional experience, subject area, identity); considers insights from diverse literatures and stakeholders.

Structured & Supported

Follows a coherent trajectory from conceptualizing the innovation to scaling it up; uses or adapts specifically-designed tools, resources, and structures.

Adapted to Context

Is responsive to local conditions; there is a sense of local ownership.

Sustained & Iterative

Involves ongoing individual and group commitment; design processes are revisited and refined over time.
